Introduction

Intangible assets are considered, property objects that do not have material content used in the long term (over 1 year) in the process of production, performance of works, rendering of services and gradually transferring its cost to the cost or expense of the period.

According to NAS No. 7 of the Republic of Uzbekistan named "intangible assets", intangible assets mainly include the following:

1. Patents, licenses and know-how;
2. Trademarks, trade marks and industrial designs;
3. Software;
4. The Right to use land and natural resources;
5. Franchising;
6. Copyright;
7. Goodwill;
8. Other intangible assets.

Now let's analyze the issues and situations that arise during the economic classification of these intangible assets.

Analysis of Subject Matters

*NSB No. 7 "Intangible assets" (revised), registered by the Ministry of justice of the Republic of Uzbekistan on June 27, 2005 No. 1485 (in a new version). This Standard was amended by Decree of the Minister of Finance of the Republic of Uzbekistan no. 9 - th 14 September 2012 no. 1485-3.

For example:

Question #1: What national standard is used to evaluate intellectual property objects?

Answer #1: Evaluation of intellectual property is carried out in accordance with the guidelines for the application of the national standard for property valuation of the Republic of Uzbekistan No. 13 "Valuation of intellectual property", registered by the Ministry of justice of the Republic of Uzbekistan on June 18, 2012 No. 2371.

Question #2: Does the right to use property included as a share in the authorized capital of the enterprise include in the composition of intangible assets?

Answer #2: the Right to use property, which is included as a share in the authorized capital of the enterprise, is included in the composition of intangible assets.

Question #3: in accordance with the main criteria for including assets in intangible assets, an economic entity does not intend to resell these assets in the future. In the opposite case, which account should account for the cost of creating these assets?

Answer #3: Otherwise, the cost of creating these assets should be accounted for in the 2010 "Main production" account.
Question #4: According to NSB #7 "Intangible assets", as one of the main criteria for inclusion of assets in intangible assets, it is necessary that it is possible to identify these intangible assets. In accordance with what criteria are intangible assets identifying?

Answer #4: If an intangible asset can be separated, that is, if it can be separated from the enterprise, sold, given to someone, leased, and if it can be exchanged by contract or obligation (other than goodwill), then the intangible asset is considered identifying.

Question #5: how can production secrets be called differently?

Answer #5: "Know-how"

Question #6: are intangible assets the right to use the name of the place of production of goods under intellectual property objects?

Answer #6: The right to use the name of the place of production of goods for intellectual property are an example of intangible assets.

Question #7: is the right to use land and natural resources an example of an intangible asset?

Answer #7: The right to use land plots and natural resources are intangible assets.

Question #8: In accordance with the legislation, organizational expenses are not included in intangible assets?

Answer #8: On the basis of the legislative act of February 24, 2009, recognized by the constituent documents, organizational expenses (expenses for the organization of a legal entity) are not included in the composition of intangible assets in accordance with the order of the Minister of Finance of the Republic of Uzbekistan dated January 21, 2009 No. 7.

Question #9: Are the intellectual and productive qualities of the company's employees, as well as their qualifications and ability to work, included in the intangible assets?

Answer #9: The intellectual and productive qualities of the company's employees, as well as their qualifications and ability to work, are not included in the intangible assets, since they are indivisible and cannot be used without their owners.

Question 10: Intangible assets with a non-exclusive right to use, i.e. a non-exclusive right to use intellectual property objects - are they included in the balance sheet of the enterprise as intangible assets?

Answer #10: Non-absolute right to use intellectual property objects are not included in the balance sheet of the enterprise as intangible assets, their accounting is maintained in the off-balance sheet account No. 015 "Received intangible assets for operation".

Question #11: are licenses (permits) issued by authorized bodies for certain types of activities included in intangible assets?

Answer #11: Licenses (permits) issued by authorized bodies for certain types of activities are included in intangible assets.

Question #12: what is the minimum period of validity of issued licenses to operate in the Republic of Uzbekistan?

Answer #12: In Uzbekistan, licenses have been issued for at least five years for the implementation of activities.

Research Methodology

*Order of the Minister of Finance of the Republic of Uzbekistan " on amendments and additions to the national accounting standard of the Republic of Uzbekistan (NSB No. 7) "Intangible assets". Registered by the Ministry of justice of the Republic of Uzbekistan on February 14, 2009, registration no. 1485-1. Tashkent, January 21, 2009, no. 7.*

Question #13: what types of licenses are issued for an unlimited period of activity?

Response No. 13: On the basis of the Decree of the President of the Republic of Uzbekistan of 16 July 2012 № up-4453 1 August 2012 on publishing activities, expertise of construction projects, architectural and town-planning documentation, design, construction, use and repair of gas and oil pipelines and oil products for an unlimited period of activity.

Question #14: How much of the state fee and fee is paid to open an audit activity in the Republic of Uzbekistan?

Answer #14: to open an audit activity in the Republic of Uzbekistan, you must pay a state fee in the amount of four minimum wages and the amount of compensation in the amount of one minimum wage (on the day of payment).

Question #15: How much does a license to transport passengers and cargo in urban, suburban, intercity and international transport cost per unit of vehicle in the Republic of Uzbekistan?

Answer #15: Since January 1, 2010, according to the Decree of the President of the Republic of Uzbekistan dated December 22, 2009 No.PP-1245, a license to transport passengers and cargo in urban, suburban, intercity and international directions per unit of vehicle, depending on its type, costs from 250 to 1000 us dollars.

Question #16: If, as of February 1, 2018, we pay 2 minimum wages to the authorized state authority for reviewing documents related to the license, how should we display this economic process in the company's accounting?

Answer #16
The company paid reviewing documents in the amount of 344,480 soums as well as payment to the authorized state authority for fees in the amount of 292,808.0 thousand soums, as in February 2018, the amount of 2 minimum wages are included in the total costs of the license.

In such a case, five-year state license fees as part of long-term and current expenses are recorded in the accounting as follows:

### Table 2.

<table>
<thead>
<tr>
<th>№</th>
<th>Contents of the business transaction</th>
<th>Amount (in thousand soums)</th>
<th>Debit</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Display of the long term part of the expenses of the 5-year state license</td>
<td>292,808,0</td>
<td>0830 &quot;Acquisition of intangible assets&quot;</td>
<td>7920 &quot;Other long term debt to various creditors&quot;</td>
</tr>
<tr>
<td>2</td>
<td>Displaying the accrual of the annual license fees the current part of the long term liabilities</td>
<td>58,561.6</td>
<td>7920 &quot;other long term debts to various creditors&quot;</td>
<td>6950 &quot;long term liabilities – current account part&quot;</td>
</tr>
<tr>
<td>3</td>
<td>Display of annual payment</td>
<td>58,561.6</td>
<td>6950 &quot;long term liabilities current part&quot;</td>
<td>5110 &quot;Current account&quot;</td>
</tr>
</tbody>
</table>

In this case, the total five-year amount of the state fee is 292,808.0 thousand soums. We will divide these liabilities into long-term (7920 "other long-term debts to various creditors" - 292,808.0 million soums) and current part of long-term liabilities (6950 "long-term liabilities-current part" - 58,561.6 million soums).

In this situation, the payment of five-year state fees in the amount of 292,808.0 thousand soums, as well as payment to the authorized state authority for reviewing documents in the amount of 344,480 soums (in February 2018, the amount of 2 minimum wages) are included in the total license expenses. The license amounts will be credited from the credit of account 0830 "Acquisition of intangible assets", to the debit of the active account 0410 "Patents, licenses and know-how".

Question #19: for Example, the company paid the initial payment for the license in February 2017 (50,923,500 soums), and the second payment should be made on January 2, 2018 (recall that in Uzbekistan in December 2017, the minimum wage increased by 15% and amounted to 172,240 soums). How do I display this business process in accounting?

Answer #19: in this case, we first charge the current part of long-term liabilities in the amount of 50,923,500 soums, i.e.:

1. Amount: 50,923,500
   Debit: 7920 "other long-term debt to various creditors" Credit: 6950 "long-term liabilities-current part"

2. When we cover the current portion of long-term liabilities:
   Amount: 50,923,500
   Debit: 6950 "long-term liabilities-current part"
3. in connection with the increase in the minimum wage, payment is made in the following order: 172,240 * 340 = 58,561,600 soums.
Amount: 58,561,600
Debit: 7920 “other long-term debt to various creditors”
Credit: 6950 "long-Term liabilities-current portion"
Amount: 58,561,600
Debit: 6950 "long-Term liabilities-current portion”

Credit: 5110 "Current account”

3. in connection with the increase in the minimum wage, payment is made in the following order: 172,240 * 340 = 58,561,600 soums.
Amount: 58,561,600
Debit: 7920 “other long-term debt to various creditors”
Credit: 6950 "long-Term liabilities-current portion”
Amount: 58,561,600
Debit: 6950 "long-Term liabilities-current portion”

Credit: 5110 "Current account”

In conclusion, much attention should be paid to the fact that the economic classification of intangible assets requires a separate study of their national and international aspects. It should also be noted how intangible assets are recorded: with temporary use rights (royalties) or absolute use rights (franchising). Royalties include temporary use of rights under trademarks, patents, software, as well as musical works, original recordings, and copyrights to feature films. With the exception of franchising (franchise) refers to the absolute right to use from brand names and well-known trademarks for predetermined rules and a fixed fee.

If there is no evidence that the value of intangible assets can increase the future economic benefits directly associated with the assets, these costs should be recognized as a period expense in accordance with established national and international rules.

*Approved by the Ministry of Finance of the Republic of Uzbekistan on August 20, 1998 No. 41, NSB No. 2 "Income from main economic activities”, registered by the Ministry of justice on August 26, 1998 No. 483.
