Introduction

Uzbek language corpus, one how much words, texts and articles collected their language their characteristics text types and modern writing to the forms according to classifier electron languages base is considered. This is the case philological studies for big important have lib, uzbek of the language grammar laws, lexicological features and his historical changes about information in getting help will give.

Of the corps main tasks - language interpretation, lexicon-network determination and sure to texts about samples collected to go. This in the corpus philological terms base formation while uzbek of the language scientific problems and new words study for very important. Philological terms the base of the word meanings according to useful information present is enough and this while researchers for necessary has been from tools is one.

Philological terms base in formation uzbek language of the corps importance very big. Because this at the base accumulated language materials philology in the field researchers and lexicographers rich profit for have will be. This materials based on uzbek language about scientific methodical to information have to be possible will be. Of this as a result uzbek of the language historical writing shape increase, new word-making process development and his grammar laws determination opportunity appear will be.

Philological terms base development through in the literature and scientific in articles many p of countries to their languages about of materials translations done increase and in them philological concepts deeper explanation possible will be. From this except this corpus students. It is also rich and effective to the result have will be because they are him explain and learning through uzbek of the language laws makes sense they know.

Our society national-spiritual the width of the bag uzbek in storage language of the corps importance very big. This corpus through of our nation to the language about features and created to the news about information storage opportunity there is it is while of our society identification in the process important important have.

Materials and methods

This research " Uzbek language of the corps main features and in it philological terms base in formation on the topic of "importance". Problems study, analysis to do and solutions offer to do with depend.

In research analytical, review, comparisons based on methods applied is uzbek of the language corpus analyze using more is formed and practical importance is determined. Philological terms base formation process comparative and description methods relied on without research reach efficient the result will give.

Subject within data poetic and prose works of scientists scientific research works, electronic resources sources based on studied. Learn statistics data is also evidence to prove source being service did.

Subject within the world and uzbek in linguistics one how much researchers research take that he went separately note reach need In particular, uzbek from scientists A. Abdullayev [1.24-30], S. Ismailov [2.45-53], M. Kadirov [3.112-120], N. Khasanov [4.78-85], D. Yuldashev [5.205-215]. Above note done of scientists scientific research sources, exactly, terminological base formation and change, innovation to enter based on is, gfan and of technology a person thinking product the fact that about the conclusion release possible will be.

These are literature to the topic about information take to go help will give and the subject deeper to your learning possibility will give.

Results and discussions

Uzbek of the language corpus, language practice development, conversation methods learn the language structure and his society by used words collection as expressed. Philological terms base and your tongue specialty according to special words collection is considered.

National language of the corps its creation main duties and philological terms base formation important important have. Analysis to the results apparently, uzbek language corpus of the tongue structure, speech methods and phraseology according to wide information aggregated without save standing, scientific to research chance creates. This in the case philological terms base while specialty to the field about information integration did without storage opportunity will give and scientific studies more efficient does. As a result uzbek language of the corps main features and in it philological terms base in

formation importance deeper to be understood possible will be This is the topic with practitioners for this article useful data present reached because of, they this knowledge practical in life successful applications for necessary to information have to be can.

To the mouth related was important aspects as the following input can:

– uzbek language corpus, uzbek of the language texts collect, save the rest and them data to the base turned data is a set. This is the case basically linguistic studies for is used;

– philological terms base, uzbek in the language philological concepts expressive word and expressions is a set. These are the terms base linguistics in the field big important have;

– uzbek language of the corps main features, its texts extended in the form Summarize the data automatic way search opportunity will give. And this linguistic researchers for Uzbek of the language structure and development about more to information have to be possibility will give;

– philological terms base of formation importance, uzbek of the language dictionary or explanatory dictionary as working of philologists knowledge level to increase help will give. This terms base filing and in search if used, uzbek in the language philological materials determination and comparison opportunity have will be.

So uzbek language of the corps main features and in it philological terms base in formation importance topic uzbek of the language in studies useful information provide, its structure about concepts to give and philological materials in search of help to give opportunity have to be with depends.

Conclusion

Uzbek language corpus, uzbek of the language meanings, explanatory dictionaries, creative texts and another important information unifying electron languages base is considered. This is the case acceptable one is a program because his using of the tongue the future for important was data collected, saved and studied.

Philological terms base and your tongue the word realities and their meanings explanation for important. In this base of the tongue grammar laws, lexicon types, phraseology and another philological materials will be located. Here cooperation doer the word or expressions lists are also available will be.

Therefore, Uzbek language of the corps creation and in it philological terms base formation very important is an issue. These are the planets creation through own our knowledge to develop possibility giving to materials have we will be Such corpus with philological terms base formation through own our language more deeper by learning to go and new to information have to be opportunity have will be.

That's it because, uzbek language of the corps main features and in it philological terms base in formation importance very big. This project through of our language development for necessary was important materials collect, save and learning opportunity have will be. Also this project through own we know more deeper also possible to develop will give.
